## Warranty

1. Tribest warrants to you, the end-user customer who has registered, that the new FreshLife Sprouter will be free from defects in materials and workmanship for a period of one(1) year from the date of purchase.
2. Upon Tribest's receipt of a written notice of such defects from you during the warranty period, Tribest, at its option, will either repair or replace the Sprouter that proved to be defective. The replacement of the Sprouter may be either new or like new. The Sprouter may contain re-manufactured or reconditioned parts, which is equivalent to new in performance or may have been subjected to incidental use.
3. This warranty does not apply to defects resulting from:
  - <a> the failure to operate the Sprouter in accordance with the instructions.
  - <b> the use of parts or supplies not provided or authorized by Tribest.
  - <c> Negligent, improper or inadequate maintenance.
  - <d> the service performed or attempted by unauthorized service person(s).
  - <e> tampering, misuse, or unauthorized modification of the sprouter.
4. TRIBEST MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OR CONDITION WHETHER WRITTEN OR ORAL. TO THE EXTENT ALLOWED BY LOCAL LAW, ANY IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR IMPLIED WARRANTY OR CONDITIONS OF MERCHANTABILITY OR SATISFACTORY QUALITY IS LIMITED TO ONE(1) YEAR. In the event that such limitation or exclusion

on the duration of an implied warranty is not allowed in the states or counties wherein you reside, the above limitation or exclusion will not apply. This warranty gives you specific legal rights and protection, and you might also have other rights that vary from state to state, or county to county.

5. TO THE EXTENT ALLOWED BY LOCAL LAW, THE REMEDIES IN THIS WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL TRIBEST BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. Some states or counties might not allow the exclusion or limitation of incidental or consequential damages. If you reside in such a state or county, the above limitation or exclusion may not be applicable.

## Parts Assembly

## Parts List

### 1. TOP LID

Helps maintain a warm temperature for rapid growth.

### 2. SPRINKLER

Sprinkles water and supplies air.

### 3. SEED TRAYS

Upper Tray : Handles up

Lower Tray : Handles up

### 4. WATER TUBE

Channels water to the sprinkler

### 5. SPROUT BARREL

Sprouts are grown in here.

### 6. WATER BARREL

Reservoir and supplies water for cultivation.

### 7. WATER PRESSURE CONTROL TUBE

Controls the quantity of water.

#### How to control water pressure:

As seen in the drawing, turning the control knob to the left will decrease the water pressure and to the right will increase the pressure.

### 8. MOTOR CHAMBER

Holds a specially designed pump with a temperature sensor.

## Instructions

- 1) Fill the WATER BARREL to with water (preferably non-chlorinated water) to one inch from the top.
- 2) Insert the WATER PRESSURE CONTROL TUBE into the center of the water barrel.
- 3) Place the SPROUT BARREL onto the WATER BARREL.
- 4) Insert the assembled WATER TUBE into the sprout barrel.
- 5) Place a LOWER TRAY (handles up) into the SPROUT BARREL and sprinkle seeds evenly. Cover with UPPER TRAY (handles up).
- 6) Place the SPRINKLER on top of the WATER TUBE and cover it with the TOP LID.
- 7) Plug in the cord of FreshLife Sprouter into the outlet.
- 8) When your sprouts have grown to the desired height (varies with the type of seed used) they are ready to harvest.
- 9) To harvest your sprouts, remove sprouts from the SPROUT BARREL. The roots will be attached to the SEED TRAY; you can pull them from the tray or cut them from it. Place sprouts in a bowl of clean water and agitate to separate clumps of sprouts. After removing the sprouts from water, drain and place them in a storage container. Store it in the refrigerator to maintain freshness. Most sprouts will remain fresh for 4-7 days when refrigerated, but make sure you check for the freshness before consumption.

## Special Features of the "FreshLife Sprouter"

- FreshLife Sprouter is for indoor use only in a room temperature of 65°F to 85°F (18.3°C~29.4°C) for the sole purpose of growing sprouts, and for no other purposes.
- FreshLife Sprouter features an automatic sprinkling system to produce fresh, nutritional and tender sprouts.
- FreshLife Sprouter can be a great educational experience for children.
- FreshLife Sprouter is inexpensive to operate and easy to clean.
- FreshLife Sprouter enables you to enjoy nutritional natural food all year round.

## Helpful Notes on Using FreshLife Sprouter

- Soaking your seeds overnight before placing them in the sprouter will help the sprouts to grow faster.
- Old seeds (more than a year old) may produce rotten sprouts or may delay their growth.
- If the water does not sprinkle within 30 seconds after the machine is on, reassemble the WATER PRESSURE CONTROL TUBE.
- We recommend minimizing the exposure of the sprouts to light by covering the lid with a dark colored cloth, especially for the yellow sprouts, such as soybean sprout. In green sprouts, this will yield a more tender taste. Just remove the cloth cover a few hours before harvesting in order to activate the chlorophyll in the sprouts.
- If fatter sprouts are desired, add some weight on top of the UPPER SEED TRAY (example: pebbles). Make sure that what you use for weight is clean.
- We recommend changing the water in the WATER BARREL every 1-2 days. If using a solution of 35% Food Grade Hydrogen Peroxide (1 table spoon to a barrel of water), this may not be necessary.
- It is normal and natural to have some foam floating on the water in the WATER BAREL during cultivation.

## DO's & DON'T's

- Don't place the FreshLife Sprouter on or near surfaces that can be damaged if exposed to water. Small amount of water may spray out during the sprinkling process or when the LID is removed.
- Don't over-water the sprouts by pouring additional water.
- Don't place FreshLife Sprouter where children can reach easily without adult's presence.
- Follow the instructions carefully.
- Don't place FreshLife Sprouter close to other indoor plants or flowers. Insects or diseases from them may be transmitted to and/or contaminate the sprouts.
- Don't place FreshLife Sprouter under direct sunlight, close to the oven, or other kitchen appliances which generate heat.
- Don't allow sprouts to overgrow.
- Clean FreshLife Sprouter thoroughly after every harvest or usage.
- Make sure you unplug the electrical cord when assembling or cleaning the FreshLife Sprouter.

### Save these instructions on Use of Extension Cord

This product is intended for household use only. The length of the cord is made short in order to reduce the risk of injuries from becoming entangled in or tripping over a long cord. An extension cord is NOT recommended when operating this product. However, if necessary, an extension cord may be used with caution. If an extension cord is used, please look for the following:

1. The marked electrical rating of the extension cord should exceed the electrical rating of FreshLife Sprouter.
2. The extension cord must be a three prong grounded type.
3. The extension cord should not be placed under the carpet and should not be placed on an area where people may trip over it.
4. Do not overload extension cord with other electrical

## Measurement of Single Cultivation

Types of Seeds	Measurement of Single Cultivation
SOYBEAN	8.5~10.5 oz
CORN	7.0~8.5 oz
MUNGBEAN	6.5 oz
BARLEY	6.5 oz
SUNFLOWER	6.5 oz
WHEAT	6.5 oz
RADISH	2.8 oz
SESAME	1.75 oz
ALFALFA	1.75 oz
BROCCOLI	1.75 oz
